Professional Summary

Backend Software Engineer specializing in Intelligent Computing with hands-on enterprise experience in the medical technology domains. Proficient in Python, Java, RESTful API architecture, and integrating AI capabilities into scalable backend systems. Proven track record of optimizing backend performance, automating cloud security pipelines, and deploying AI solutions serving 6,000+ users.

Education

Universiti Sains Malaysia
Bachelor of Computer Science (Intelligent Computing) with Honors Expected October 2027

- CGPA: 3.75/4.00, Dean's List (Sem 1 – present)
- Relevant courses: Data Structures, Algorithms, Database Design, Machine Learning, Computational Intelligence, Operating Systems
- Certificates: Tableau Data Visualization and Machine Learning workshops for Semiconductor Industry

Skills

Languages: C++, Java, Python, R, JavaScript, SQL
Frontend/Backend: ReactJS, Flutter, TailwindCSS, Bootstrap, Node.js, Flask, Django, Java Servlet
Databases/Tools/Cloud: PostgreSQL, Git, Docker, Vite, npm, Google Cloud Platform, Microsoft Azure

Experience

Backend Developer Intern, B. Braun Medical Industries March 2026 – August 2026

- Designed and developed a FastAPI backend for a physical access management PoC supporting access requests, status tracking, and door discovery workflows.
- Implemented 20+ RESTful APIs covering authentication, approval workflows, SAP integrations, AI chatbot services, real-time speech/avatar functionality, and facial recognition capabilities.
- Integrated Azure OpenAI, Azure Speech Services, SAP systems, and enterprise databases to enable AI-assisted user guidance, door access retrieval, and automated approval routing.
- Collaborated on backend architecture, API documentation, testing, and deployment, contributing over 240 code commits across multiple application modules.
- Leveraged Snyk and SonarQube code analysis tools to identify and remediate security and code quality issues, contributing to a 67% reduction in reported vulnerabilities (30 to 10 findings).

Projects

SeJahit github.com

- Built a full-stack used clothes selling platform using ReactJS, Vite, Java Servlet, and PostgreSQL, enabling smooth client-server communication and structured data handling.
- Delivered end-to-end features covering UI design, routing, form handling, REST API development, validation, and backend integration.

DuitWise DuitWise

- Built a cross-platform finance application using Flutter, delivering consistent performance across Android and iOS.
- Implemented modular widget-driven architecture and mobile-first user flows to improve scalability, maintainability, and navigation.

Extracurricular

Penghulu (Head Facilitator), Program Pembimbing Siswa Lestari (PPSL) Indah Kembara
September 2026 – October 2026

- Led a 10-member facilitator team throughout a two-week university orientation program, overseeing daily operations, logistics, student welfare, and program execution for 210+ incoming freshmen at Desasiswa Indah Kembara.
- Streamlined freshman registration and hostel check-in workflows by coordinating student movement, facilitator assignments, and placement processes to reduce congestion and maintain efficient operations.
- Directed large-scale student movement and activity logistics across campus, ensuring schedule adherence, effective crowd management, and smooth execution of consecutive orientation activities.
- Managed evening programming, safety protocols, and welfare response while serving as a key communication link between university administrators, facilitators, and 210+ incoming students.

Executive Committee, MPDIK October 2023 – October 2025

- Led a division of 8 members while managing logistics, budgeting, and stakeholder coordination for university-scale programs.
- Mentored junior committee members and improved team reliability, execution speed, and operational turnaround.

Executive Committee, Computer Science Society October 2023 – October 2024

- Executed flagship events including VHACK and PIXEL, supporting large-scale participant operations and technical coordination.
- Directed logistics, AV systems, venue operations, and website-related contributions under the society's Technical Division.
