Education

Universiti Sains Malaysia

Bachelor of Computer Science (Intelligent Computing) with Honors

Expected October 2027

- CGPA: 3.75/4.00, Dean's List (Sem 1 – present)
- Relevant courses: Programming Methodology & Data Structures, Design & Analysis of Algorithms, Database Organization & Design, Machine Learning and Computational Intelligence, Operating Systems
- Certificates: Online Hands-on Workshop on Introduction to Data Visualization by Tableau for Semiconductor Industry, Online Hands-on Workshop on Introduction to Machine Learning for Semiconductor Industry

Skills

Programming Languages: C++, Java, Python, R, JavaScript, SQL

Frontend: ReactJS, Flutter, TailwindCSS, Bootstrap

Backend: Node.js, Flask, Django, Java Servlet

Databases: PostgreSQL

DevOps & Tooling: Git, Docker, Vite, npm

Cloud Platforms: Google Cloud Platform (GCP), Azure

Experience

Backend Developer Intern, B. Braun Medical Industries

March 2027 – August 2027

- Developing backend components for an internal Agentic AI Proof of Concept focused on physical access management and employee access request workflows.
- Integrating SAP, Axxon Face Recognition Module, and SQL Server with backend APIs hosted on Azure App Service to support enterprise system interoperability.
- Implementing grounded multi-agent workflows using Azure AI Foundry and Azure Speech Service to enable context-aware, voice-based user interaction.

Projects

SeJahit

github.com

- Built a full-stack tailoring service platform using ReactJS + Vite and Java Servlet (Tomcat), enabling fast UI load times and smooth client-server communication.
- Developed a PostgreSQL-backed REST API for item management, form handling, and data validation.
- Delivered an end-to-end solution that covers UI design, state management, routing, and backend integration.

DuitWise

DuitWise

- Built a cross platform application using Flutter, delivering consistent performance across Android and iOS.
- Implemented a modular, widget driven architecture with robust state management to ensure scalability and maintainability.
- Designed and optimized mobile first user experiences, resulting in smoother navigation and improved performance.

Extracurricular

Executive Committee, MPDIK

October 2023 – October 2025

- Led a division of 8 members, improving operational turnaround and team coordination while delivering university-scale events with 30 to 50 participants.
- Owned end-to-end logistics, budgeting, and stakeholder communication, ensuring on-time execution across multiple high-pressure programs.
- Build a strong junior talent pipeline by mentoring committee members, increasing team reliability and execution speed.

Executive Committee, Computer Science Society

October 2023 – October 2024

- Executed flagship events such as VHACK, an international hackathon, and PIXEL with full-cycle operational oversight, supporting hundreds of participants.
- Directed logistics, AV systems, and venue operations, reducing setup downtime and ensuring seamless technical execution.
- Strengthened the society's digital presence by contributing to the Technical Division and maintaining key features of the official website of the CS Society.
