Education

Universiti Sains Malaysia

Bachelor of Computer Science (Intelligent Computing) with Honors

Expected October 2027

- CGPA: 3.75/4.00, Dean's List (Sem 1 – present)
- Relevant courses: Data Structures, Algorithms, Database Design, Machine Learning, Computational Intelligence, Operating Systems
- Certificates: Tableau Data Visualization and Machine Learning workshops for Semiconductor Industry

Skills

Languages: C++, Java, Python, R, JavaScript, SQL

Frontend/Backend: ReactJS, Flutter, TailwindCSS, Bootstrap, Node.js, Flask, Django, Java Servlet

Databases/Tools/Cloud: PostgreSQL, Git, Docker, Vite, npm, Google Cloud Platform, Microsoft Azure

Experience

Backend Developer Intern, B. Braun Medical Industries

March 2026 – August 2026

- Developed backend APIs for a physical access management PoC, enabling employees to submit access requests, monitor request status, and discover authorized access points through a kiosk application.
- Engineered a Python-based backend service layer to manage workflow processing, input validation, API contracts, and seamless frontend integration.
- Integrated enterprise applications, databases, and recognition services to facilitate reliable cross-system communication and access data synchronization.
- Contributed to Microsoft Azure deployment activities and strengthened application security and maintainability through Snyk vulnerability scanning and SonarQube code quality analysis.
- Delivered AI-powered voice guidance functionality for kiosk users, enhancing accessibility and streamlining access request submission workflows.

Projects

SeJahit

github.com

- Built a full-stack used clothes selling platform using ReactJS, Vite, Java Servlet, and PostgreSQL, enabling smooth client-server communication and structured data handling.
- Delivered end-to-end features covering UI design, routing, form handling, REST API development, validation, and backend integration.

DuitWise

DuitWise

- Built a cross-platform finance application using Flutter, delivering consistent performance across Android and iOS.
- Implemented modular widget-driven architecture and mobile-first user flows to improve scalability, maintainability, and navigation.

Extracurricular

Executive Committee, MPDIK

October 2023 – October 2025

- Led a division of 8 members while managing logistics, budgeting, and stakeholder coordination for university-scale programs.
- Mentored junior committee members and improved team reliability, execution speed, and operational turnaround.

Executive Committee, Computer Science Society

October 2023 – October 2024

- Executed flagship events including VHACK and PIXEL, supporting large-scale participant operations and technical coordination.
- Directed logistics, AV systems, venue operations, and website-related contributions under the society's Technical Division.
